(54) PORTABLE COMMUNICATION INFORMATION TERMINAL

(57)Abstract:

PROBLEM TO BE SOLVED: To obtain a portable communication information terminal to enable a series of operation with fingers of one hand to hold a terminal main body, which can be stored in a pocket of clothes, etc., with enhanced operability and portability.

SOLUTION: An antenna part 7 and various operation switches 8 are arranged on the same side part of the terminal main body 1, a pen storage part 9 is arranged on the opposite side part, a card storage part and a card EJECT key of a memory card with data saving function are arranged on the rear side and a rotary switch with a function to select data displayed on a liquid crystal display part 2 and a push key with a function to establish the data are arranged on the same surface of the side part. Furthermore, a liquid crystal part with a function to display a radio state and a key with a switching function of on/off of radio are arranged on the same top surface part, and arranging positions of each of the switches and keys are set within reach of the fingers of one hand to hold the terminal main body 1.
